---

## SOFTWARE ENGINEER

Results-driven Software Engineer with full-stack development expertise in JavaScript, React, and MongoDB. Combining creative problem-solving with technical implementation to create responsive web apps that enhance engagement and optimize performance.

## TECHNICAL SKILLS

**Frontend:** HTML5, CSS3, JavaScript, TypeScript, React, Redux, Next.js, Tailwind

**Backend:** Node.js, Express, MongoDB, MySQL

**Other:** Git, Jest, APIs, C#, PHP, Unity, Accessibility, SEO

## PROFESSIONAL EXPERIENCE

### Software Engineer (Contractor) | [Ontario Animal Welfare Network](#) (FEB - MAR 2025)

- Engineered React application with TypeScript implementing WCAG 2.1 accessibility standards
- Optimized SEO with structured data markup, improving search visibility by 30%

### WordPress Developer | Self-employed MAY 2021 - PRESENT

- Developed custom booking platform serving 500+ users with PHP, Google Maps API, and WP Mail integration
- Implemented security measures including reCaptcha to prevent bot attacks on contact forms
- Improved site performance using W3 Total Cache and enhanced booking functionality with Bookly addons

### Human Resource Coordinator & Scheduler | Allied Universal JUN 2023 - JAN 2024

- Coordinated scheduling for 400+ employees across multiple systems, ensuring site requirements and backup coverage
- Generated monthly billing reports by extracting and organizing data from multiple platforms
- Achieved 97% client satisfaction through systematic problem-solving and cross-functional collaboration

### Senior Supervisor Team Lead | Allied Universal JAN 2020 - JUN 2023

- Created and managed JIRA tickets for cross-departmental issue tracking and resolution
- Diagnosed and resolved technical problems including badge access issues and alarm system troubleshooting
- Designed comprehensive training documentation with screenshots and step-by-step guides for OnGuard Monitor system

## PROJECTS

### Software Engineer | [BoguStore](#) SEP 2024

- Built a Next.js e-commerce platform with Redux-powered state management, cutting subsequent page loads by ~20%
- Formulated Jest test suites with 90% coverage, contributing to a ~25% drop in production bugs

### Software Engineer | [QuestListRPG](#) JUN 2024

- Spearheaded development of an interactive task manager application with gamification elements using the MERN stack
- Integrated DALL-E 3 API to generate custom reward images, boosting user engagement

## EDUCATION

### BrainStation | Diploma, Software Engineering (APR 2024)

Completed intensive 12-week program and developed a full-stack app demonstrating proficiency with React, Node, Express, MySQL

## CERTIFICATIONS

Unity Game Developer, Unreal Engine Developer, Unity Mobile Developer
